BRIEFING STRIP™

○ PAPI 03 (4.5°), 21 (4.5°), 15 (4.5°) - APAPI 33 (4.5°) - THRL 03/21 & 15/33 - RL 03/21 & 15/33 - RENL 03/21 & 15/33 - WDI - OBSTL

RWY No	Dimension (m) - Surface	TORA (m)	LDA (m)	Strength	Lights
03 (033°)	791 x 18 Asphalt	717	791		
21 (213°)		791	717		
15 (151°)	640 x 18 Asphalt	564	530		
33 (331°)		556	564		
08 (079°) ①	566 x 18 Asphalt	566	566		---
26 (259°) ②					

① AVBL for TKOF only.

② AVBL for LDG only.

No landings on RWY 08. No take-offs on RWY 26. RWY 08/26 is not available to solo students.

Grass RWY 15/33 is unlicensed, for details including dimensions/declared distances contact the AD.

RWY 26 is not available for circuits. RWY 03 RH traffic circuit. Circuit height at 1000' AAL. ULM circuit height for ACFT flying at IAS less than 70 KT 700' AAL. ULM using the 700' AAL circuit to prefix downwind radio call with 'Microlight'.

Avoid overflying bird sanctuary at Castle Espie 3 NM S of AD.

WARNING: There is high ground and a lighted obstruction (Scabo Tower) that infringes the protected surface of the 26 climb-out. There are near-in lamp

standards on the Comber Road that may present an obstruction in the event of a late decision to commence a missed approach. Turbulence may be experienced during a missed approach. Advice: Pilots of ACFT carrying out an approach to RWY 26 should satisfy themselves at or above 300' that they can safely land and stop on the RWY. In the event of any doubt pilots are advised to commence a missed approach and make an early left turn to avoid the high ground. The pilot of an ACFT attempting to make a landing on RWY 26, who has not established wheels firmly on the ground before crossing the intersection with RWY 21, is advised to commence a missed approach. Once established in the climb an early left turn should be made away from the rising ground.

NEWTOWNARDS
UNITED KINGDOM

Pilots landing on RWY 33 should exercise caution on the approach to avoid possible pedestrian and vehicular traffic on the sea wall. Turbulence and wind shear may be experienced on approach to RWY 33 in conditions of strong winds.

The AD is frequently used outside published hours of operation.

Pilots to exercise cautions as different heights and sizes of circuits may in use simultaneously. ULM using the 700' AAL circuit to exercise caution when turning base due to potential conflict with ACFT on final. ACFT flying the 1000' AAL circuit to exercise caution due to potential conflict with ACFT operating in the 700' AAL circuit.

Vehicles on public road 150m from THR 15.

Model ACFT activity on AD located at the western hangars.

HEL Operations

In order to minimise the impact of noise on local residents all HEL operating into or from Newtownards shall obey the following restrictions:

Approaches

HEL shall not approach the AD through the sector of the AD traffic zone between the extended centre-line of RWY 21 and the extended centre-line of RWY 26, and HEL shall not make any approaches to RWY 08. If approaching the AD from the west they shall either route to the north of Scrabo Hill or join the extended centre-line of RWY 03 before the ATZ boundary and thereafter remain to the right of the RWY centre-line.

Departures

- HEL departing from RWY 21 shall ensure that they do not fly west of the extended 21 centre-line until outside the ATZ.
- HEL shall not depart from RWY 26.

Hovering on the AD

- Visiting HEL shall not carry out hovering practice at Newtownards without specific prior permission. Arriving HEL shall route as expeditiously as possible to their planned set down area and shall shut down as soon as possible.
- Local HEL shall take all possible actions to minimise noise impact from hover practice by avoiding hover training up-wind of residential areas.
