11 (105°) 29 (285°)	680 x 46 Unpaved	667	617 597		---

AD availability subject to tidal variation.

Weather minima: VIS 3 KM, cloud base 1000' AAL. Pilots must be able to see and avoid OBST on TKOF & LDG.

WARNING: LDG and TKOF areas may be considerably ridged by hard sand and contain pools of standing water, presenting potential hazards to ACFT.

The bearing strength, braking action and contamination of the beach is unknown, variable and unpredictable.

Downdraughts may occur at the western end of RWY 07/25 in strong wind from W through S.

Pilots should be aware that cockling activities frequently take place between the RWY markers and the tide-line. Both pedestrian and vehicular activity may occur and from the air may appear to infringe THR's during published AD op hr.

A flashing white light on top of TWR advises the local Cocklers that an ACFT movement is imminent and is in no way to be used as a navigational aid by aircrew.
