RWY No	Dimension (m) - Surface	TORA (m)	LDA (m)	Strength	Lights
06R (057°) 24L (237°)	1448 x 32 Asphalt	1199	1199	PCN 27/F/C/W/T	---
06L (057°) 24R (237°)	882 x 25 Grass	880	880		---

AD may close during adverse weather conditions. The AD is only open for visitors during specified hours.

No simultaneous use of RWYs.

Pilots should avoid overflying all surrounding local villages and adjacent bird sanctuary.

ACFT intending to fly in the ATZ must be equipped with two-way RTF and be able to communicate with Duxford. In exceptional circumstances, ACFT without two-way RTF may be given prior approval and information to permit them to fly safely in the ATZ. Pilots are reminded that historic ACFT displays and formation flying are frequent activities at Duxford. Pilots are urged to make their initial RTF call to DUXFORD INFORMATION at least 8 NM from the ATZ boundary.

All circuit training strictly PPR.

Please visit

<https://www.iwm.org.uk/visits/iwm-duxford/pilots> for additional museum, airfield information and links to the airfield fees and AD manuals.

WARNING: Taxi with caution due to reduced obstacle clearance. Earth bank in front of THR 24.

Pilots should not overfly the gas venting station SE of AD BLW 2700'.

Linton Zoo has birds of prey flying up to 2500'.

When operating to the N of AD outside of Duxford ATZ, it is strongly advised that communication is established with CAMBRIDGE APPROACH/RADAR 120.965 and note the Cambridge RWY 23/05 Instrument Final Approach.

Fighter and high performance ACFT regularly carry out non-standard manoeuvres and use NATO style joining procedures. Visiting pilots must call in plenty of time before entering ATZ.

No overflight of the museum buildings below 1000' AGL. CTN should be exercised in regards to Fowlmere AD that lies 3 NM W of AD. Fowlmere training TFC circuit enters the NW area of the Duxford ATZ.

Flight Procedures

There are no overhead, dead-side, or crosswind joins at Duxford to assist in deconfliction of circuit patterns.

Circuit patterns are variable with no dead-side. It is therefore essential that pilots obtain a briefing from Duxford before departure whether inbound or outbound.

Traffic DEP RWY 06 continue straight ahead for 2 NM before turning. Traffic joining for RWY 24 LH; join downwind and PSN for 2 NM final. Traffic joining for RWY 06 RH join downwind. Traffic DEP RWY 24 LH no right turn until passed Royston.
